Education

Bachelor of Science

Simon Fraser University, Canada

2015–2017

- Second Degree in Computing Science
- Coursework: data structures and algorithms, big data, machine learning, numerical analysis, computer architecture, networking, satisfiability, operating systems, computer vision, technical writing, security, web development, programming languages

Bachelor of Business Administration

Simon Fraser University, Canada

2008–2012

- Bachelor of Business Administration
- Coursework: project management, management science, organizational theory, organizational behavior, marketing, finance, accounting, business writing, business strategy, operational simulation, operations management, entrepreneurship

Work Experience

Loop Now Technologies

React Native & iOS Engineer

September 2018–Current

- Developed new UI features from designs in ObjC (40%), Swift (30%), and React Native (30%)
- Ran UI optimization experiments with analytics tracking & cohorts
- Developed React Native modules for Native integration and vice versa
- Localization, patented video view, social sharing, client architecture, custom dependencies

Nano 3 Labs

Full Stack Developer

July 2017–July 2018

- Developed PictureThat iOS augmented reality app from functional prototype to release & iteration cycles
- Wrote a Ruby on Rails backend for payment processing
- Translated a website design to a responsive bootstrap 4 site using Jekyll, Sass and AWS
- Built a Mixed Reality demo on iPad using Occipital's Bridge Engine using Unity and C#
- Developed React and React Native components for large-scale applications

Lipsi Technologies

Senior iOS Developer

November 2016–March 2018

- #1 Lifestyle app on App Store USA (March 2018) for anonymous messaging
- Scaled from no users to 2.3M users and facilitated growth
- Turned prototype legacy Objective-C code into highly modular, readable, Swift code

Fitplan Technologies

iOS Developer

March 2015–September 2015

- Developed a fitness application that distributes celebrities' workout programs for subscription
- Accelerated development time by refactoring 40,000 lines Objective-C code into 28,000 lines
- Delivered dozens of elaborate animated UI view controller screens from wireframe designs to iOS screen in piecemeal growth, each taking about one workday to add
- Proactively improved the server API and implementation to improve performance

Lighthouse Labs*Teaching Assistant*

January 2014–December 2014

- Trained multiple cohorts of iOS developers from no knowledge to fully productive junior developers which placed them in Nike, Hootsuite, among other advanced roles

Camvy Technologies*iOS Developer*

March 2013–June 2014

- Developed an automatic video editing and messaging app using AVFoundation framework
- Self-taught iOS from in four months from no programming experience
- Learned Ruby on Rails to develop a RESTful API, handling algorithmic message routing

Technical Skills

Swift/Objective-C

C / C++ / Java / Python

Algorithm Design

iOS SDK / Cocoapods

Java/Android SDK

Lean Architecture

Scrum/Agile

React / React Native

Extreme Programming

Ruby on Rails

AWS / Serverless

Technical Writing

HTML/CSS/Javascript

Test Driven Development

Git / Github
